General Description

GT2104-PMBD GT2104-PMBDS GT2104-PMBDS2 GT2104-PMBLS

Thank you for purchasing Mitsubishi Electric Graphic Operation

	MODEL	GT2104-P-U-GD-JE		
J	Model code	1D7MT2		
	IB(NA)-0800589-F(2109)MEE			

This manual describes the part names, dimensions, mounting, and specifications of the product. Before use, read this manual and manuals of relevant products fully to acquire proficiency in handling and operating the product. Make sure to learn all the product information, safety information, and precautions. And, store this manual in a safe place so that you can take it out and read it whenever

necessary. Always forward it to the end user Registration

Ethernet is a registered trademark of Xerox Corporation in the United States. The company name and the product name to be described in this manual are the registered trademarks or trademarks of each company.

Effective: Sep. 2021

Safety Precaution●

(Read these precautions before using.)

Before using this product, please read this manual and the relevant manuals introduced in this manual carefully and pay full attention to safety to handle the

The precautions given in this manual are concerned with this product.

In this manual, the safety precautions are ranked as "WARNING" and "CAUTION"

<u></u> MARNING	Indicates that inco conditions, resulting
⚠CAUTION	Indicates that inconditions, resulting physical damage.

es that incorrect handling may cause hazardous ons, resulting in death or severe injury. es that incorrect handling may cause hazardous

Depending on circumstances, procedures indicated by "CAUTION" may also be linked to serious results. In any case, it is important to follow the directions for usage

[DESIGN PRECAUTIONS]

MARNING

- ✓ WARNING
 Some failures of the GOT or cable may keep the outputs on or off. Some failures of a touch panel may cause malfunction of the input objects such as a touch switch. An external monitoring circuit should be provided to check for output signals which may lead to a serious accident. Not doing so can cause an accident due to false output or malfunction.
 Do not use the GOT as the warning device that may cause a serious accident. An independent and redundant hardware or mechanical interlock is required to configure the device that displays and outputs serious warning. Not doing so can cause an accident due to false output or malfunction.
 When the GOT detects its backlight failure, the GOT disables the input operation on the touch switch(s). Thus, operators cannot operate the GOT with touches. The GOT backlight failure can be checked with a system signal of the GOT.
 Even when the display section has dimmed due to a failure of the fliquid crystal section or the backlight on the GOT, the input operation of the touch switches. For example, if an operator assumes that the display section of the touch switches. For example, if an operator assumes that the display section has dimmed because of the screen save function and touches the display section has dimmed because of the screen save function and touches the display section has dimmed because of the screen save function and touches the display section or cancel the screen save, a touch switch may be activated. In touches. The GOT backlight failure can be checked with a system signal of the GOT.
 The display section of the GOT is an analog-resistive type touch panel. Simultaneous pressing of two or more areas on the display section may activate the switch between those areas. Do not press two or more areas simultaneously on the display section to may activate the switch between those areas. Do not press two or more areas simultaneously on the display section to the GOT joungams or param

[DESIGN PRECAUTIONS]

A JAPANESE

B ENGLISH

≜WARNING

To maintain the security (confidentiality, integrity, and availability) of the GOT and the system against unauthorized access, DoS^{*1} attacks, computer viruses, and othe system against unauthorized access, DoS ' attacks, computer viruses, and othe cyberattacks from unreliable networks and devices via network, take appropriat measures such as firewalls, virtual private networks (VPNs), and antivirus solutions. Missushi Electric shall have no responsibility or laidity for any problems involvin GOT trouble and system trouble by unauthorized access, DoS attacks, compute viruses, and other cyberattacks.

"I DoS: A denial-of-service (DoS) attack disrupts services by overloading systems c exploiting vulnerabilities, resulting in a denial-of-service (DoS) state.

⚠CAUTION

- Do not bundle the control and communication cables with main-circuit, power or other wiring. Run the above cables separately from such wiring and keep them a minimum of 100 mm apart. Not doing so noise can cause a malfunction.

 Do not press the GOT display section with a pointed material as a pen or driver. Doing so can result in a damage or failure of the display section.

 When a GOT2000 series model and a GOT1000 series model are on an Ethernet network, do not set the IP address 192.168.0.18 for the GOTs and the controllers on this network. this network.

 Doing so can cause IP address duplication at the GOT startup, adversely affecti
 the communication of the device with the IP address 192.168.0.18.

 The operation at the IP address duplication depends on the devices and the syste
- o. es and the systen Turn on the controllers and the network devices to be ready for communicatio before they communicate with the GOT. Failure to do so can cause a communicatio error on the GOT.
- When the GOT is subject to shock or vibration, or some colors appear on the scre of the GOT, the screen of the GOT might flicker.

MOUNTING PRECAUTIONS

_WARNING

Be sure to shut off all phases of the external power supply used by the system befor mounting or removing the GOT main unit to/from the panel. Not doing so can caus the unit to fail or malfunction.

- Use the GOT in the environment that satisfies the general specifications des this manual. Not doing so can cause an electric shock, fire, malfunction or damage or deterioration.
- damage or deterioration. When mounting the GOT to the control panel, tighten the mounting screws in the specified torque range (0.20 N·m to 0.25 N·m) with a Phillips-head screwdriver No.2 Undertightening can cause the GOT to drop, short circuit or malfunction Overtightening can cause a drop, short circuit or malfunction due to the damage of the screws or the GOT. Remove the protective film of the GOT. When the user continues using the GOT with
- he nove the protective film, the film may not be removed.

 Operate and store the GOT in environments without direct sunlight, high temperature, dust, humidity, and vibrations.

 Do not use the GOT in an environment with oil or chemicals. Doing so may cause failure or malfunction due to the oil or chemical entering into the GOT.

WIRING PRECAUTIONS

∆WARNING

Be sure to shut off all phases of the external power supply used by the system befor wiring. Failure to do so may result in an electric shock, product damage of maifunctions.

- Please make sure to ground FG terminal of the GOT power supply section by applying 100 Ω or less which is used exclusively for the GOT. Not doing so may cause an electric shock or malfunction.

 Correctly wire the GOT power supply section after confirming the rated voltage and terminal arrangement of the product. Not doing so can cause a fire or failure.

 Tighten the terminal screws of the GOT power supply section in the specified torque range (0.22 N·m to 0.25 N·m). Undertightening can cause a short circuit or malfunction. Overtightening can cause a short circuit or malfunction due to the damage of the screws or the GOT.

 Exercise care to avoid foreign matter such as chips and wire offcuts entering the GOT. Not doing so can cause a fire, failure or malfunction.

 Plug the communication cable into the GOT interface or the connector of the connected unit, and tighten the mounting screws and the terminal screws in the specified torque range. Undertightening can cause a short circuit or malfunction.

 Overtightening can cause a short circuit or malfunction due to the damage of the screws or unit.

[TEST OPERATION PRECAUTIONS]

MARNING

Before performing the test operations of the user creation monitor screen (such a turning ON or OFF bit device, changing the word device current value, changing the settings or current values of the timer or counter, and changing the buffer memor current value), read through the manual carefully and make yourself familiar with operation method. During test operation, never change the data of the devices whice are used to perform significant operation for the system. False output or malfunction can cause an accident.

[STARTUP/MAINTENANCE PRECAUTIONS]

<u>∧</u>WARNING

- When power is on, do not touch the terminals. Doing so can cause an electric shock or malfunction. Before starting cleaning or terminal screw retightening, always switch off the powe externally in all phases. Not doing so can cause the unit to fail or malfunction Undertightening can cause a short circuit or malfunction. Overtightening can cause a short circuit or malfunction. Overtightening can cause a short circuit or malfunction of the screws or unit.

∴CAUTION

- Do not disassemble or modify the unit. Doing so can cause a failure, malfunction injury or fire.

 Do not touch the conductive and electronic parts of the unit directly. Doing so can be conductive and electronic parts of the unit directly. Doing so can be conductive and electronic parts of the unit directly.
- Do not touch the conductive and electronic parts of the unit directly. Doing so can cause a unit malfunction or failure.

 The cables connected to the unit must be run in ducts or clamped. Not doing so can cause the unit or cable to be damaged due to the dangling, motion or accidental pulling of the cables or can cause a malfunction due to a cable connection fault.

 When unplugging the cable connected to the unit, do not hold and pull from the cable portion. Doing so can cause the unit or cable to be damaged or can cause a malfunction due to a cable connection fault.

 Do not draw the medities are the cast of the cable.
- cable portion. Doing so can cause the unit or able to be damaged or can cause a malfunction due to a cable connection fault.

 Do not drop the module or subject it to strong shock. A module damage may result. Before fouching the unit, always touch grounded metals, etc. to discharge static electricity from human body, etc. Not doing so can cause the unit to fail or malfunction.

- matunction.

 Replace battery with GT11-50BAT by Mitsubishi electric Co. only.
 Use of another battery may present a risk of fire or explosion.
 Dispose of used battery promptly.
 Keep away from children. Do not disassemble and do not dispose of in fire.

[TOUCH PANEL PRECAUTIONS]

∴CAUTION

- For the analog-resistive film type touch panels, normally the adjustment is no required. However, the difference between a touched position and the object position may occur as the period of use elapses. When any difference between a touched position add the object position occurs, execute the touch pane calibration.

 When any difference between a touched position and the object position occurs
- califoration.

 When any difference between a touched position and the object position occurs other object may be activated. This may cause an unexpected operation due to incorrect output or malfunction.

[PRECAUTIONS WHEN THE DATA STORAGE IS IN USE]

If the SD card mounted on drive A of the GOT is removed while the GOT is accessed, processing for the GOT might be interrupted about for 20 seconds. Th GOT cannot be operated during this period. The functions that run in th background including a screen updating, alarm, logging, scripts, and others are also interrupted. Since this interruption makes an impact to the system operation, might cause failure. After inhibiting access to the SD card on the GOT utilit screen, check that the SD card access LED is off and remove the SD card.

∴CAUTION

- Do not remove the data storage from the GOT while the data storage is being accessed by the GOT, or the data storage and files may be damaged. Before removing the data storage, check the SD card access LED, relevant system signal, or others to make sure that the data storage is not being accessed. Turning off the GOT while it accesses the SD card results in damage to the SD

- I furning off the GOT while it accesses the SD card results in damage to the SD card and filles.

 After inserting an SD card into the SD card unit, make sure to enable the SD card access in the GOT utility.

 Not doing so causes the data not to be read or written.

 When removing the SD card from the GOT, make sure to support the SD card by hand as it may pop out.

 Not doing so may cause the SD card to drop from the GOT, resulting in a failure or break.
- break.

 Before removing the data storage from the GOT, follow the procedure for remova on the utility screen of the GOT. After the successful completion dialog is displayed, remove the data storage by
- hand carefully. Not doing so may cause the data storage to drop from the GOT, resulting in failure or break.

IPRECAUTIONS FOR USE)

∆CAUTION

- Do not touch the edges of the touch panel (display section) repeatedly.
 Doing so may result in a failure.
 Do not turn off the GOT while data is being written to the storage memory (ROM
- Doing so may corrupt the data, rendering the GOT inoperative

[DISPOSAL PRECAUTIONS]

Item

⚠CAUTION

When disposing of this product, treat it as industrial waste.
When disposing of batteries, separate them from other wastes according to the local regulations. (Refer to the GOT2000 Series User' Manual (Hardware) for details of the batter directive in the EU member states.)

GT2104-PMBD

channel Data transfer method:10B

[TRANSPORTATION PRECAUTIONS]

∴CAUTION

When transporting lithium batteries, make sure to treat them based on th transport regulations.

(Refer to the GOT2000 Series User' Manual (Hardware) for details of the regulater models.)

∆CAUTION

- Make sure to transport the GOT main unit and/or relevant unit(s) in the manne they will not be exposed to the impact exceeding the impact resistance described in the general specifications of this manual, as they are precision devices. Failure to do so may cause the unit to fail. Check if the unit operates correctly after transportation.
- transportation. When fumigants that contain halogen materials such as fluorine, chlorine, bromine and iodine are used for disinfecting and protecting wooden packaging from insects, they cause malfunction when entering our products. Please takk necessary precautions to ensure that remaining materials from fumigant do not enter our products, or treat packaging with methods other than fumigation (heamethod). Additionally, disinfect and protect wood from insects before packing products.

Certification of UL. cUL standards

Using GOT GOT is for use on a Flat Surface of a Type 1 Enclosure.

Notification of CE marking

The following products have shown compliance through direct testing (to the identified standards) and design analysis (forming a technical construction file) to the European Directive for Electromagnetic Compatibility when used as directed by the appropriate

- cumentation.
 This product is designed for use in industrial applications
 Type: Graphic operation terminal
 Models: GOT2000 series

Standard	Remark		
EN61131-2 : 2007 Programmable controllers -	EMI	Compliance with all relevant aspects of the standard. (Radiated Emissions)	
Equipment,	EMS (ESD, RF electromagnetic field, EFTB, S	Compliance with all relevant aspects of the standard. (ESD, RF electromagnetic field, EFTB, Surge, RF conducted disturbances and Power frequency magnetic field)	

Compliant with the UKCA marking
Requirements for compliance with the UKCA marking are the same with the EC Directives (CE marking).

Manual shows manuals relevant to this product.

Detailed Manual

Manual name	Manual number (Model code)
GOT2000 Series User's Manual (Hardware)	SH-081194ENG (1D7MJ5)
GOT2000 Series User's Manual (Utility)	SH-081195ENG (1D7MJ6)

For detailed manuals, refer to the PDF manuals stored in the DVD-ROM for the drawing software used.

Relevant Manuals

The Ideas manuals, refer to the Help or the PDF manuals stored in the DVD-ROM for the drawing software used. The latest manuals are also available from MITSUBISHI ELECTRIC FA Global Website (www.MitsubishiElectric.com/fa).

Before using the GOT
Connect the connector of the GOT to the connector of the battery.
Refer to the GOT2000 Series User's Manual (Hardware) for the connection instructions.
For details on the GOT specifications, installing instructions, wiring, maintenance and inspection, or checking procedure for the version and the compatible standard, refer to the GOT2000 Series User's Manual (Hardware).

1. GOT SERIES USER'S MANUAL SPECIFICATIONS

Item		Specifications				
Operating ambient temperature*1	0 to 55°C ^{*7} (When m	0 to 55°C ^{*7} (When mounted horizontally), 0 to 50°C (When mounted vertically)				
Storage ambient temperature	-20 to 60°C	-20 to 60°C				
Operating ambient humidity	10% RH to 90% RH,	10% RH to 90% RH, non-condensing*2				
Storage ambient humidity	10% RH to 90% RH,	non-condensing*2				
	JIS B3502 and IEC61131-2		Frequency	Acceleration	Half amplitude	Sweep Count
		Under intermittent	5 to 8.4 Hz	-	3.5 mm	10 times in each X, or Z direction
Vibration resistance		vibration	8.4 to 150 Hz	9.8m/s ²	-	
		Under continuous vibration	5 to 8.4 Hz	-	1.75 mm	-
			8.4 to 150 Hz	4.9m/s ²	-	
Shock resistant	Compliant with JIS B	Compliant with JIS B3502 and IEC61131-2 147m/s ² (15G) Three times in each X, Y, or Z direction				
Operating atmosphere	No greasy fumes, co	No greasy fumes, corrosive gas, flammable gas, excessive conductive dust, and direct sunlight (as well as at storage)				
Operating altitude*3	2000 m or less	2000 m or less				
Installation location	Inside control panel	Inside control panel				
Overvoltage category*4	II or less	II or less				
Pollution degree*5	2 or less	2 or less				
Cooling method	Self-cooling	Self-cooling				
Grounding	Grounding with a gro	Grounding with a ground resistance of 100 Ω or less by using a ground cable that has a cross-sectional area of 2 mm ² or more.				

- If impossible, connect the ground cable to the control panel.
- 1 The operating ambient temperature indicates the temperature inside the enclosure of the control panel. V
 1 The operating ambient temperature indicates the temperature inside the enclosure of the control panel to which the GOT is installed.
 2 If the ambient temperature exceeds 40°C, the absolute humidity must not exceed 90%RH at 40°C.
 3 Do not use or store the GOT under pressure higher than the atmospheric pressure of altitude 0 m. Doing so may cause a malfunction. When an air purge is made inside the control panel by adding pressure, there may be a clearance between the surface sheet and the screen, making you difficult to use the touch panel, or the sheet may come off.
 4 This indicates the section of the power supply to which the equipment is assumed to be connected between the public electrical power distribution network and the machinery within the premises. Category II applies to equipment for which electrical power is supplied from fixed facilities. The withstand surge voltage for the equipment with the rated voltage up to 300 V is 2500 V.
 5 This indicates the occurrence rate of conductive material in an environment where a device is used. Pollution degree 2 indicates an environment where only non-conductive pollution occurs normally and a temporary conductivity caused by condensation shall be expected depending on the conditions.
 6 DCSV type is not required ground.
 7 When a protective cover for oil is mounted on the GOT, the maximum operating ambient temperature must be 5°C lower than the one described above.

- Bright dots (always lit) and dark dots (unlit) may appear on a liquid crystal display panel due to its characteristics. It is impossible to completely avoid this symptom, as the liquid crystal display comprises of a great number of display elements. In addition, color tone difference, unevenness of brightness, or flickers may occur due to individual differences of liquid crystal display panels. Please note that these symptoms occur due to GOT's characteristic and are not caused by product defect.

 2 Flicker may occur due to vibration, shock, or display color.

 3 Settings the screen saving backlight to OFF prevents the display screen from burn-in and enables the backlight to lengthen its life.

 4 When using a stylus pen, it will be 100,000 times. (The specifications must be satisfied the following condition.)

 Material: Polyacetal resin Tip radius: 0.8 mm or more

 5 If you touch two points or more simultaneously on the touch panel, a switch in an unintended location may operate. Do not touch two or more points on the touch panel simultaneously.

- To you douch two points of more simulatineously or the GOT in accordance with the connection type when adopting GOT multidrop connection.

 16 Set the terminating resistor selector switch of the GOT in accordance with the connection type when adopting GOT multidrop connection.

 17 Note that this does not guarantee all users' operation environment. In addition, the GOT may not be usable in the environment where oil or chemicals are splashed o long time or where oil mist is filled.

 18 The suffix "F" of IP67F is a symbol that indicates protection rate against oil. It is described in the Appendix of JIS C 0920 of the Japanese Industrial Standards.

1.3 Power Supply Specifications

Item Input power supply voltage		Specifications				
		GT2104-PMBD GT2104-PMBDS GT2104-PMBDS2		GT2104-PMBDS2	GT2104-PMBLS	
		DC24 V (+10%, -15%)	DC24 V (+10%, -15%)		DC5V (±5%)	
Power	Under the maximum load	2.9 W or less	2.2 W or less		1.1W or less	
consumption	At backlight off	2.2 W	1.5 W		0.7W	
Inrush current		30 A or less (1ms, 25°C, at the maximum load)			-	
Permissible ins	tantaneous power failure time	Within 5ms	Within 5ms			
Noise immunity		Noise voltage: 1000 Vp-p, Noise width: 1 µs (by noise simulator of 30 to 100 Hz noise frequency)				
Dielectric withstand voltage		500 VAC for 1 minute (between the GOT's power supply terminals and the GOT's grounding terminal)			-	
Insulation resistance		10 M Ω or larger by insulation resistance tester (between the GOT's power supply terminals and the GOT's grounding terminal)				
Electrical wire size		No. of wire per terminal: 1 Solid wire 0.14 to 1.5 mm ² AWG26 to AWG16, Stranded wire 0.14 to 1.0 mm ² AWG26 to AWG18, Ferrules with plastic sleeve 0.25 to 0.5 mm ² AWG24 to AWG20 No. of wire per terminal: 2 Solid wire 0.14 to 0.5 mm ² AWG26 to AWG20, Stranded wire 0.14 to 0.2 mm ² AWG26 to AWG24				
Wire type		Use copper or copper-clad aluminum conductors.				
Temperature rating of a wire		More than 70°C				
Ferrules with plastic sleeve		AI 0.25-6BU (AWG24), AI 0.34-6TQ (AWG22), AI 0.5-6WH (AWG20) (Phoenix Contact Inc.)				
Crimper type		CRIMPFOXZA3 (Phoenix Contact Inc.)				
Tightoning torque (terminal corougs)		0.22 to 0.25 N.m.				

2. WIRING OF CONNECTION CABLE

The diagram below shows cable assignment for GOT port. Cables for GT2104-PMBD: GT21-C□□□□R4-8P5, GT21-C□□□□R4-25P5 Cables for GT2104-PMBDS: GT10-CDIDIR4-8P, GT10-CDIDIR4-25F

Mitsubishi Electric Corporation cannot be held responsible for any problems involving industrial property rights which may occur as a result of using the contents noted in this manual.

Warranty

Warranty
Exclusion of loss in opportunity and secondary loss from warranty liability
Regardless of the gratis warranty term, Mitsubishi Electric shall not be liable for
compensation to:
(1) Damages caused by any cause found not to be the responsibility of
Mitsubishi Electric.

Mitsubishi Electric.
(2) Loss in opportunity, lost profits incurred to the user by Failures of Mitsubishi Electric products.
(3) Special damages and secondary damages whether foreseeable or not, compensation for accidents, and compensation for damages to products other than Mitsubishi Electric products.

(4) Replacement by the user, maintenance of on-site equipment, start-up test run and other tasks

for safe use

This product has been manufactured as a general-purpose part for general industries, and has not been designed or manufactured to be incorporated in a device or system used in purposes related to human life. Before using the product for special purposes such as nuclear power, electric power, aerospace, medicine or passenger movement vehicles, consult with

Mitsubishi Electric This product has been manufactured under strict quality control. However when installing the product where major accidents or losses could occur if the product fails, install appropriate backup or failsafe functions in the system.
