MITSUBISH QJ61CL12 CC-Link/LT Master Module

Thank you for purchasing the Mitsubishi general-purpose programmable controller MELSEC-Q Series.

Before starting use, please read through this manual and the details manual to ensure correct usage.

SAFETY PRECAUTIONS

(Always read these instructions before using this equipment.) Before using this product, please read this manual and the relevant manuals introduced in this manual carefully and pay full attention to safety to handle the product correctly. These instructions apply only to Mitsubishi equipment. Refer to the user's manual of the CPU module to use for a description of the programmable controller system safety instructions. In this manual, the safety instructions are ranked as "AWARNING " and "ACAUTION". _____

Indicates that incorrect handling may cause hazardous conditions, resulting in death or severe injury.
Indicates that incorrect handling may cause hazardous conditions, resulting in medium or slight personal injury or physical damage.

Note that the A CAUTION level may lead to a serious consequence according to the circumstances.

Always follow the instructions of both levels because they are important to personal safety. Please save this manual to make it accessible when required and always forward it to the end licor

[Design Precautions]

• Do not bunch the control wires or communication cables with the main circuit or power
wires, or install them close to each other.

They should be installed 100mm (3.9inch) or more from each other Not doing so could result in noise that would cause erroneous operation

[Installation Precautions]

- Use the program able controller in an enviro nt that meets the general specific contained in the CPU user's manual to use.
- Using this programmable controller in an environment outside the range of the general specifications could result in electric shock, fire, erroneous operation, and damage to co
- deterioration of the product. While pressing the installation lever located at the bottom of module, insert the module fixing tab into the fixing hole in the base unit until it stops. Then, securely mount the module with the fixing hole as a supporting point.
- Incorrect loading of the module can cause a malfunction, failure or drop.
- When using the programmable controller in the environment of much vibration, tighten the module with a screw. Tighten the screw in the specified torque range.

Undertightening can cause a drop, short circuit or malfunction. Overtightening can cause a drop, short circuit or malfunction due to damage to the screv or module.

Completely turn off the externally supplied power used in the system before mounting of

 Do not directly touch the module's conductive parts or electronic components. Touching the conductive parts could cause an operation failure or give damage to the module.

[Wiring Precautions]

• Shut off the external power supply for the system in all phases before wiring. Failure to de so may result in electric shock or damage to the product.

- Be sure there are no foreign substances such as sawdust or wiring debris inside the module. Such debris could cause fires, damage, or erroneous operation.
 The module has an ingress prevention label on its top to prevent foreign matter, such as wire officuts, from entering the module during wiring.
 Do not peel this label during wiring.
 Do not peel this label during wiring.
- Before starting system operation, be sure to peel this label because of heat dissipation. For the CC-Link/LT, use the cables specified by the CC-Link Partner Association. The performance of the CC-Link/LT cannot be assured if any other cables than the
- specified are used.
- Also, observe the network wiring specifications given in Chapter 2. Normal data communication is not guaranteed if the wiring is not conducted according to the specifications.
- Place the communication cables or power cables for the module in a duct or to fasten them with clamps. If not, the dangling condition, shift or inadvertent pulling of the cables may lead to damage
- to the module or cables, or a malfunction due to faulty cable connection. When disconnecting a communication cable or power cable from the module, do not hole
- and pull the cable portion by hand. For the cable with a connector, hold the connector connected to the module with a hand
- For the cable connected to a terminal block, loosen the screws on the terminal block and
- disconnect the cable. Pulling the cable with it connected to the module may result in malfunctions or damage t the module and/or cables.

CONDITIONS OF USE FOR THE PRODUCT (1) Mitsubishi programmable controller ("the PRODUCT") shall be used in conditions

i) where any problem, fault or failure occurring in the PRODUCT, if any, shall not lead to any major or serious accident; and

ii) where the backup and fail-safe function are systematically or automatically provided outside of the PRODUCT for the case of any problem, fault or failure occurring in the PRODUCT.

(2) The PRODUCT has been designed and manufactured for the purpose of being used in general industries.

MITSUBISHI SHALL HAVE NO RESPONSIBILITY OR LIABILITY (INCLUDING, BUT NOT IMITED TO ANY AND ALL RESPONSIBILITY OR LIABILITY BASED ON CONTRACT, WARRANTY, TORT, PRODUCT LIABILITY) FOR ANY INJURY OR DEATH TO PERSONS OR LOSS OR DAMAGE TO PROPERTY CAUSED BY the PRODUCT THAT ARE OPERATED OR USED IN APPLICATION NOT INTENDED OR EXCLUDED BY INSTRUCTIONS, PRECAUTIONS, OR WARNING CONTAINED IN MITSUBISHI'S USER, INSTRUCTION AND/OR SAFETY MANUALS, TECHNICAL BULLETINS AND GUIDELINES FOR the PRODUCT.

("Prohibited Application") Prohibited Applications include, but not limited to, the use of the PRODUCT in; Nuclear Power Plants and any other power plants operated by Power companies, and/or any other cases in which the public could be affected if any problem or fault occurs in the PRODUCT.
 Railway companies or Public service purposes, and/or any other cases in which establishment

of a special quality assurance system is required by the Purchaser or End User. Aircraft or Aerospace, Medical applications, Train equipment, transport equipment such as Elevator and Escalator, Incineration and Fuel devices, Vehicles, Manned transportation, Equipment for Recreation and Amusement, and Safety devices, handling of Nuclear or Hazardous Materials or Chemicals, Mining and Drilling, and/or other applications where there is a significant risk of injury to the public or property.

Notwithstanding the above, restrictions Mitsubishi may in its sole discretion, authorize use of the PRODUCT in one or more of the Prohibited Applications, provided that the usage of the PRODUCT is limited only for the specific applications agreed to by Mitsubishi and provided further that no special quality assurance or fail-safe, redundant or other safety features which exceed the general specifications of the PRODUCTs are required. For details, please contact the Mitsubishi representative in your region.

ABOUT MANUAL

The following manual is also related to this product. In necessary, order it by quoting the details in the table below

Related Manual

Manual name	Manual number (Model code)
CC-Link/LT Master Module User's Manual	SH-080351E (13JR62)

Conformation to the EMC Directive and Low Voltage Instruction

- (1) For programmable controller system
- To configure a system meeting the requirements of the EMC and Low Voltage Directives when incorporating the Mitsubishi programmable controller (EMC and Low Voltage Directives compliant) into other machinery or equipment, refer to Chapter 9 "EMC AND LOW VOLTAGE DIRECTIVES" of the QCPU User's Manual (Hardware Design, Maintenance and Inspection).

The CE mark, indicating compliance with the EMC and Low Voltage Directives, is printed on the rating plate of the programmable controller. (2) For the product

For the compliance of this product with the EMC and Low Voltage Directives, refer to Chapter 9 "EMC AND LOW VOLTAGE DIRECTIVES" of the QCPU User's Manual (Hardware Design, Maintenance and Inspection).

1. Overview

This manual describes the specifications, names of each part and the settings, etc., for the QJ61CL12 CC-Link/LT master module (hereinafter QJ61CL12) used in combination with the MELSEC-Q Series programmable controller CPU.

2. Specifications

2.1 Performance specifications

The performance specifications of the QJ61CL12 are shown below. Refer to the user's manual of the CPU module in use for the general specifications of the QJ61CL12

		Item		Specifications					
				4-point mode	8-point mode	16-point mode			
		um link points		256 points	512 points	1024 points			
			ddress is used)	(512 points)	(1024 points)	(2048 points)			
		ints per station		4 points	8 points	16 points			
	(When	the same I/O a	ddress is used)	(8 points)	(16 points)	(32 points)			
		When 32	Number of points	128 points	256 points 0.8ms	512 points			
Control		stations are	2.5Mbps	0.7ms	1.0ms				
specifications	Link	connected	625kbps	2.2ms	2.7ms	3.8ms

- Performance of the Cc-Link/LT cannot be guaranteed for use of cables flat cables, VCTF cables and high flexible cables.
 Set with the operation setting switch. (Refer to Chapter 4)
 Supplied through the dedicated power supply or power supply adapter.
 For VCTF cable specifications, refer to Table 2.1.

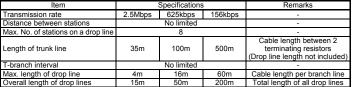

*5: Use the dedicated flat cables and high flexible cables accredited by the CC-I ink Partner Association http://www.cc-link.org/

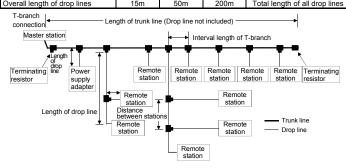

Table 2.1 VCTF cable specifications (Extract from JIS C 3306)

			Conductor			Conductor				
Туре	No. of cores	Norminan	Composition No. of wires/wire diameter	Outside diameter	Insulator thickness	Sheath thickness	(20 °C)			
Vinyl cabtyre, Round cord	4	0.75mm ²	30/0.18mm	1.1mm	0.6mm	1.0mm	25.1Ω /km			

2.2 Network wiring specifications

The network wiring specifications of the CC-Link/LT are given below

3. Mounting and installation

3.1 Precautions for handling

The precautions for handling the module are given below.

(1) The module is mode of resin. Do not drop or give it a strong impact. (2) Do not remove the PCB (printed-circuit board) from the case. Doing so may cause failure

- (3) When wiring, be careful not to let foreign matter such as wiring chips enter the module inside. Remove it if this happens.
- (4) The module has an ingress prevention label on its top to prevent foreign matter such as wire offcuts, from entering the module during wiring. Do not peel this label during wiring. Before starting system operation, be sure to peel this label because of heat dissipation.

(5) Tighten the module fixing screws within the following ranges

Screw Tightening torque range Module fixing screw (M3 screw)*1 0.36 to 0.48N • m

1: The module can be easily fixed onto the base unit using the hook at the top of the module However, it is recommended to secure the module with the module fixing screw if the module is subject to significant vibration.

POINT

When removing the terminating resistor due to any system modification, be sure to power OFF the system. Removing/Installing the terminating resistor with the power ON may cause malfunctions (faulty input/output).

3.2 Installation environment

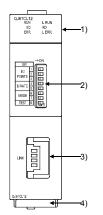

Refer to the User's Manual of the CPU module in use.

3.3 Cables, Connectors and Terminating Resistors

For inquires about the cables, connectors and/or terminating resistors, refer to the following:

http://www.cc-link.org/

4. Name of Parts and Setting

4)	Serial number plate	Indicates the serial No. of the QJ61CL12													
POINT															

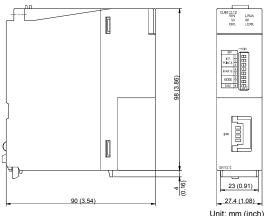

The settings of operation setting switches become valid when the module is turned ON from OFF or when the programmable controller CPU is reset. When any of settings are changed with the module powered ON, "ERR." LED will blink. In this case, turn OFF and restart the system.

5. External Wiring

The connection method of the CC-Link/LT connection cables is described below. The cables can be connected regardless of the order of the station number.
 Be sure to set the QJ61CL12 at the end of the trunk line. The terminating resistor close to the QJ61CL12 should be connected within 20cm from the QJ61CL12. (3) Connect terminating resistors to the both ends of the trunk line of CC-Link/LT without fail.

(4) For required number of the connectors, refer to the CC-Link/LT Master Module User's Manual.

6. External Dimensions

Mitsubishi will not be held liable for damage caused by factors found not to be the cause of Mitsubishi; machine damage or lost profits caused by faults in the Mitsubishi products; damage, secondary damage, accident compensation caused by special factors unpredictable by Mitsubishi; damages to products other than Mitsubishi products; and to other duties.
