●SAFETY PRECAUTIONS●

(Always read these precautions before using this equipment.)

Before using this product, please read this manual and the relevant manuals introduced in this manual carefully and pay full attention to safety to handle the product

The precautions given in this manual are concerned with this product. In this manual, the safety precautions are ranked as "WARNING" and "CAUTION".

Indicates that incorrect handling may cause hazardous I conditions, resulting in death or severe injury.

⚠ CAUTION

Indicates that incorrect handling may cause hazardous I conditions, resulting in medium or slight personal injury or physical damage.

Note that the A CAUTION level may lead to a serious accident according to the Always follow the precautions of both levels because they are important to per-

Please save this manual to make it accessible when required and always forward it

IDESIGN PRECAUTIONS

⚠ CAUTION

Do not bunch the control wires or communication cables with the main circuit or power wires, or lay them close to each other.

As a quide, separate the lines by a distance of at least 100mm (3.94 inches) otherwise malfunctions may occur due to noise.

INSTALLATION PRECAUTIONS

∆WARNING

- Be sure to shut off all phases of the external power supply used by the system before mounting or removing this unit to/from the GOT. Not doing so can cause a unit failure or malfunction.
- Before connecting the Bus connection cable to this unit, always shut off GOT power and PLC CPU power externally in all phases.Not doing so can cause a malfunction.

⚠ CAUTION

- Use this unit in the environment that satisfies the general specifications described in the User's Manual for the GOT used. Not doing so can cause an electric shock, fire, malfunction or product damage or deterioration.
- Do not drop the unit or subject it to string shock.
- A unit damage may result.
- A unit damage may result. When installing this unit to the GOT, fit it to the connection interface of the GOT and tighten the mounting screws in the specified torque range (0.36 N·m to 0.48 N·m) with a Phillips-head screwdriver No.2. Undertightening can cause a drop, failure or malfunction. Overtightening car cause a drop, failure or malfunction due to screw or unit damage.

[WIRING PRECAUTIONS]

∆WARNING

Be sure to shut off all phases of the external power supply used by the system before wiring.

Failure to do so may result in an electric shock, product damage or malfunctions.

⚠ CAUTION

- Exercise care to avoid foreign matter such as chips and wire offcuts entering the unit.

 Not doing so can cause a fire, failure or malfunction.
- Make sure to securely connect the cable to the connector of unit Incorrect connection may cause malfunctions

[STARTUP AND MAINTENANCE PRECAUTIONS]

MARNING

- Before starting cleaning, always shut off GOT power externally in all phases Not doing so can cause a unit failure or malfunction. Undertightening can cause the GOT to drop, short circuit or malfunction. Overtightening can cause a short circuit or malfunction due to the damage of
- Do not disassemble or modify any unit. This will cause failure, malfunction, injuries, or fire.
- Do not touch the conductive areas and electronic parts of this unit directly. Doing so can cause a unit malfunction or failure.

⚠ CAUTION

- Always secure the cables connected to the unit, e.g. run them in conduits or clamp them. Not doing so can cause unit or cable damage due to dangling, moved or accidentally pulled cables or can cause a malfunction due to a cable contact fault.
- Do not hold the cable part when unplugging any cable connected to the unit.

 Doing so can cause unit or cable damage or a malfunction due to a cable contact fault.
- Always make sure to touch the grounded metal to discharge the electricity charged in the body, etc., before touching the unit. Failure to do so may cause a failure or malfunctions of the unit.

[DISPOSAL PRECAUTIONS]

⚠ CAUTION

Dispose of this product as industrial waste

[TRANSPORTATION PRECAUTIONS]

⚠ CAUTION

Make sure to transport the GOT main unit and/or relevant unit(s) in the manner they will not be exposed to the impact exceeding the impact resistance described in the general specifications of the User's Manual for the GOT used, as they are precision devices. Failure to do so may cause the unit to fail. Check if the unit operates correctly after transportation.

[TRANSPORTATION PRECAUTIONS]

⚠ CAUTION

When fumigants that contain halogen materials such as fluorine, chlorine, bromine, and lodine are used for disinfecting and protecting wooden packaging from insects, they cause malfunction when entering our products Please take necessary precautions to ensure that remaining materials from fumigant do not enter our products, or treat packaging with methods other than fumigation (heat method).

Additionally, disinfect and protect wood from insects before packing products.

Manual

The following shows manuals relevant to this product

Manual name	Manual number (Model code)
GOT2000 Series User's Manual (Hardware) (Sold separately)	SH-081194ENG (1D7MJ5)

Compliance with the EMC and Low Voltage **Directives**

To configure a system meeting the requirements of the EMC and Low Voltage Directives when incorporating the Mitsubishi GOT (EMC and Low Voltage Directives compliant) into other machinery or equipment, refer to "EMC AND LOW VOLTAGE DIRECTIVES" of the General Description included with the GOT used. The CE mark, indicating compliance with the EMC and Low Voltage Directives, is printed on the rating plate of the GOT.

Compliance with the new China RoHS directive

GOT 相关的基于 " 电器电子产品有害物质限制使用管理办法 " 要求的表示方法

Note: This symbol mark is for China only.

1. OVERVIEW

This User's Manual describes the following units.

When mounting the following units with the GT27, the GOT can display video images taken by a camcorder or a RGB screen.

- The GT 27 video input unit GT27-V4-Z (hereinafter referred to as the video input unit) is configured with the GT 16 video unit and the Video Interface Converter Unit. For the video input unit, the GOT can display video images taken by up to four
- camcorders.

 The GT 27 video/RGB input unit GT27-V4-Z (hereinafter referred to as the video/RGB input unit) is configured with the GT16 video/RGB input unit and the Video Interface Converter Unit.

 For the video/RGB input unit, the GOT can display video images taken by up to four camcorders or a RGB screen for up to one device for the RGB input. The GT27 RGB input unit GT27-R2-Z (hereinafter referred to as the RGB input unit) is configured with the GT16 RGB input unit and the Video Interface Converter Unit.

For the RGB input unit, the GOT can display only one RGB screen by switching

For the video input with using the above units, the GOT can be used as a vision

sensor monitor.

For the RGB input unit with using the above units, the units can be used as the RGB output type vision sensor.

- 1:Power on the GOT simultaneously with the camcorder
- *2:Depending on the camcorder type, noise from the power supply cable of the camcorder may cause malfunction of the GOT or a programmable controller In this case, attach the following line filter to the power supply line of the Recommended line filter: TDK-Lambda RSHN-2003 (or equivalent products)
- *3:If the flickering of the screen occurs due to the noise from the RGB cable, attach the following ferrite core to the RGB input section.

 Recommended ferrite core: TDK-Lambda ZCAT3035-1330 (or equivalent
- *4:When connecting any of the above units to a personal computer, ground the ground cable of the personal computer

To use the video input unit, video/RGB input unit, and RGB input unit, set the

For the settings and system configurations, refer to GOT2000 Series Connection Manual (Microcomputer, MODBUS Products, Peripherals) for GT Works3 Version

ı. For the details of the video input, video/RGB input, and RGB input function, refer to GT Designer3 (GOT2000) Help.

2. SPECIFICATIONS

The performance specifications of the video input unit, video/RGB

input unit, and RGB input unit are indicated below. The general specifications of the video input unit, video/RGB input unit, and RGB input unit are the same as those of the GOT.

Refer to the User's Manual for the GOT used for the general specifications of the

- *2:The GOT cannot display both video images and RGB screens at the same time *3:The GOT can display only one RGB screen.

3. PART NAMES AND EXTERNAL **DIMENSIONS**

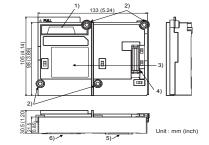

3.1 GT16 Video/RGB Input Unit, GT16 Video Input Unit, and GT16 RGB Input Unit

The external dimensions for all the units are the same except the connector dimensions of the video input section and the RGB input section.

133 (5.24

No.	Name	Description
1)	Extension connector	Connector for connecting an extension unit
2)	Mounting screw	Screw for fixing the Video Interface Converter Unit
3)	Rating plate	-
4)	Connector for RGB input	Connector for connecting 9-core combined cables
5)	Video connector	Video connector connected to the Video Interface Converter Unit
6)	Interface connector	Connector connected to the Video Interface Converter Unit
7)	Connector for video input	Connector for connecting a coaxial cable

3.2 Video Interface Converter Unit

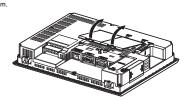

No.	Name	Description
1)	Extension connector	Connector for connecting the GT16 Video/RGB Input Unit, GT16 Video Input Unit, or GT16 RGB Input Unit
2)	Mounting screw	Screw for fixing the GOT
3)	Rating plate	-
4)	Video connector	Video connector for connecting the GT16 Video/RGB Input Unit, GT16 Video Input Unit, or GT16 RGB Input Unit
5)	Auxiliary extension connector	Auxiliary extension connector connected to the GOT
6)	Interface connector	Extension connector connected to the GOT

4. INSTALLATION AND REMOVAL PRO-**CEDURE**

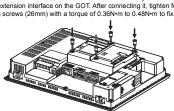

4.1 Unit Installation

The installation procedure for the video/RGB input unit is explained using the

2) Pull up the two hooks in the extension unit cover (two covers) of the GOT to ward the opposite side of the hoots of the cover as

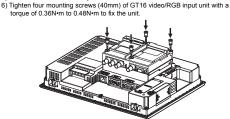

Connect the Video Interface Converter Unit to the auxiliary extension interface and the extension interface on the GOT. After connecting it, tighten four mounting screws (26mm) with a torque of 0.36N+m to 0.48N+m to fix the unit.

- Remove the protection cap for the connector to be used.

 (Store the removed protection cap.)

 5) Fit the GT16 video/RGB input unit n the Video Interface Converter Unit case.

8) For mounting no extension unit on the unit, cover over four mounting screws RGB input unit, or the Video Interface Converter Unit to avoid static electricity Keep the connector cover fixed.

For removing the Video/RGB Input Unit, Video Input Unit, and RGB Input Unit, reverse the procedure of the installation.
