

FR-A8NCG PLUG-IN OPTION

Release of the FR-A8NCG plug-in option for CC-Link IE TSN communication

- FR-A800 with CC-Link IE TSN communication function available
- Plug-in option FR-A8NCG for standard FR-A800 and FR-F800 series

Features

CC-Link IE TSN communication

With the CC-Link IE TSN (Time Sensitive Networking) communication function, data can be transmitted to IT systems while performing real-time cyclic communication control.

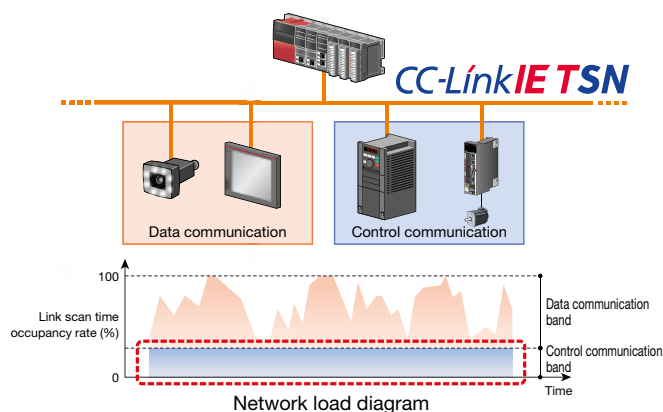

CC-Link IE TSN is also supported by FR-A800/FR-F800 standard inverters with the plug-in option FR-A8NCG (information on how to identify applicable inverters on the back of this document).

Merits

Startup time reduction

Station numbers are easily set with rotary switches.

Automatic detection of the network configuration by the engineering software (GX Works3) reduces the startup time. Problems at startup such as line

faults can be discovered at a glance with the diagnostic function.

Improved maintainability

Time synchronization allows for real-time monitoring. This enables trouble analysis to be performed right after an error has occurred.

FR Configurator2 can be connected via Ethernet, which makes maintenance work easier.

Communication specifications

The communication specification varies depending on the specification of the master.

ITEM	DESCRIPTION
Transmission speed	1 Gbps
Minimum synchronization cycle	125.00 μs
Authentication class	Authentication class B
Synchronization function	Time sharing method
Communication method	Compliant with IEEE 802.1AS and IEEE 1588v2
Maximum number of connected units	121 units (sum of master and slave stations)
Topology	Line, star ^① , ring ^② , or a combination of line and star
Connection cable	Ethernet cable (IEEE 802.3 1000BASE-T compliant cable or ANSI/TIA/EIA-568-B (Category 5e) compliant shielded 4-pair branched cable)

ITEM	DESCRIPTION	
Connector	Shielded RJ-45	
Node type	Remote station	
Maximum distance between nodes	100 m	
Maximum number of branches	No upper limit within the same Ethernet system	
Maximum cyclic size (of one node)	RX	64 bits
	RY	64 bits
	RWr	128 words
	RWw	128 words

- ① To connect only the authentication class B devices in the wye connection, use a CC-Link IE TSN compatible switching hub (TSN hub).
 ② Ring topology will be supported later.

- ① Models can be alternatively indicated with the inverter rated capacity (ND rating).
 ② Specification differs by the type as follows.
 ③ Available for the 00170 or higher.
 ④ For using the 02160 or higher inverter and a 75 kW or higher motor, always install a DC reactor (FR-HEL), which is available as an option.
 ⑤ The depth required for installation will be 2.1 mm larger than that of the standard model.

COMPATIBLE INVERTERS (FR-A800/FR-F800 SERIES)

The FR-A8NCG can be used with the inverter models which have the following SERIAL number or later.

Check the SERIAL number indicated on the inverter rating plate.

COUNTRY OF ORIGIN INDICATION	SERIAL NUMBER	MANUFACTURED YEAR AND MONTH
MADE in Japan	□ 9 6 ○○○○○○	June 2019 or later
MADE in China	□ 9 7 ○○○○○○	July 2019 or later

↑ Control number
 ↑ Month
 ↑ Year
 ↑ Symbol

The SERIAL consists of one symbol, two characters indicating the production year and month, and six characters indicating the control number. The last digit of the production year is indicated as the Year, and the Month is indicated by 1 to 9, X (October), Y (November), or Z (December).
