Installation

■ Items to be checked before installation

• Log on to the personal computer as an administrator.
• Close all running applications before installation. If the product is installed while other applications are running, it may not operate normally.
• Before installing GX Configurator-PN, check that GX Works3 Version 1.032J or later has been installed. If not installed, install GX Works3 first, and then install GX Configurator-PN.

1. Unzip the compressed folder.
2. Double-click "setup.exe" in the unzipped folder to start the installer.
3. Select or enter the necessary information by following the on-screen instructions.

■ Precautions

• "WOODHEAD SOFTWARE & ELECTRONICS S.A.S.U." is displayed as a publisher of the software. Trust the publisher and continue the installation procedure.
• When GX Configurator-PN is installed successfully, a dialog box to prompt user to restart the computer appears. Before installation, save all the data being edited by any applications. Otherwise, data may be lost.

Uninstallation

Uninstall GX Configurator-PN from the control panel of Windows.

■ Precautions

• When GX Configurator-PN is uninstalled successfully, a dialog box to prompt user to restart the computer appears. Before uninstallation, save all the data being edited by any applications. Otherwise, data may be lost.
