- Before using this product, read this document carefully, and use the product properly while paying full attention to safety.

Installation

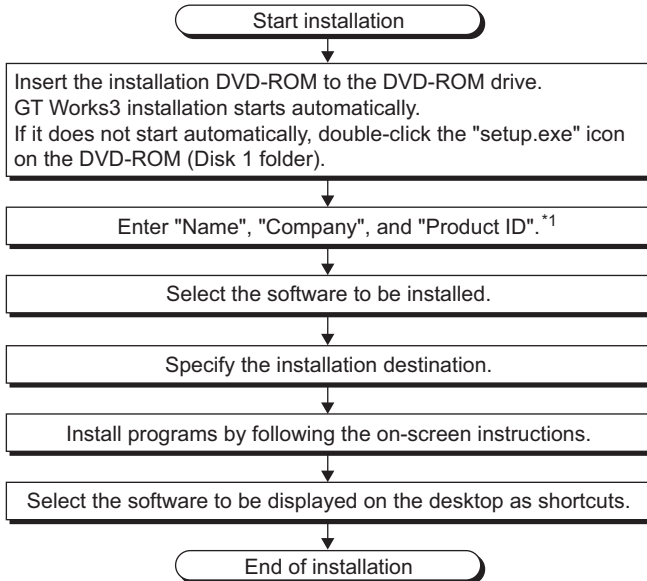

The following explains how to install GT Works3 to a personal computer.

■ Check before installation

- Log on to the personal computer with administrator privileges.
- Close all the software applications running under Microsoft Windows Operating System before installation. Otherwise, the product may not be installed properly.

■ Batch installation

Install multiple software in a batch.

*1 : Product ID is written on the "License certificate" included with the product. Enter the 12-digit number divided into 3 and 9 digits.

■ Individual installation

Each software can be used individually by installing only the required software.

Double-click the "setup.exe" icon in each folder to install the software. For the software where the setup.exe is not included, copy the entire folder and then run it.

Folder	Software	Location of "setup.exe", execution module

*1 : A software for registering the license. A separate license is required.

Precautions

- Make sure that the system does not enter a power saving mode (standby, hibernation, or sleep mode) during software installation.
- If the driver installation confirmation screen appears during software installation, follow the on-screen instructions to install the driver.
- If a warning message from the security software is displayed, proceed the installation by following the on-screen instructions.
- If you need the latest version of GT Works3, consult your local sales office.
- After installation, please do not save the data in the following folder.
 <Installation folder>\GTD3_2000\App
 <Installation folder>\GTD3

Uninstallation

The following explains how to uninstall GT Works3 from the personal computer.

1. To uninstall GT Works3, select "Add or Remove Programs" in Windows Control Panel, and select "GT Works3". Then, click the Remove button.
