# Installation method of the MELSOFT MX MESInterface

Thank you for choosing the Mitsubishi Electric MELSEC-Q Series of MELSOFT MX MESInterface.
In order to use this product, install the component to the personal computer according to the following procedure.

[Procedures for Installing and Uninstalling]

- Before starting installation, terminate all of other applications running on Windows® .
- When installing or uninstalling MX MESInterface, log on as a user with Administrator authority.
- For the operating environment and installation/uninstallation, also refer to the manual provided on the product CD.
- When installing MELSOFT to a Windows Vista® , Windows 7, Windows 8, Windows 8.1, and Windows 10-based personal computer, read the technical bulletin FA-A-0008/FA-A-0091/FA-A-0153/FA-A-0207.

* For the correspondence of the operating system, refer to the manual on the product CD.

(1) Installation procedure

```
                    ┌─────────────────────┐
                    │  Installation start  │
                    └─────────────────────┘
                              │
   ┌──────────────────────────────────────────────────────┐
   │ Insert the product CD to a drive, and double-click    │
   │ "setup.exe" in the folder on the CD.                  │
   └──────────────────────────────────────────────────────┘
                              │
   ┌──────────────────────────────────────────────────────┐
   │ Select the component to be installed, and click the   │
   │ Install button. (Screen 1)                            │
   └──────────────────────────────────────────────────────┘
                              │
   Exit        ◇ Which software is to be installed? ◇
```

DB Connection Service and Setting Tool	MES Interface Function Configuration Tool
Enter user information and the product ID. (Screen 2)	Enter user information and the product ID. (Screen 2)
Select the installation destination. (Screen 3)	Select the installation destination. (Screen 3)

```
   ┌─────────────────┐
   │  Installation   │
   └─────────────────┘
            │

   │ Installation end │
   └─────────────────┘
```

* To install DB Connection Service and Setting Tool Version 1, run the Setup.exe in the SUPPORT folder.
* For details on the DB Connection Service and Setting Tool Version 1 and Version 2, refer to the following manual.
  MES Interface Module User's Manual

(Screen 1)	(Screen 2)	(Screen 3)

* If the confirmation screen appears during the installation, follow the screen instructions.
* Up to 100 characters can be used for the installation destination.

(Continued on the back page)

* If either of the screens in Screen 4 appears, select "Allow" or "YES".

* If Screen 5 appears, execute "\EnvMEL\SETUP.exe" in the product CD.
   After completion of the "Environment of MELSOFT" installation, Screen 6 may be displayed. Click on "This program installed correctly", and close the screen.
   Do not select "Reinstall using recommended settings" because selecting it will install improper modules.

(Screen 4)

(Screen 5)	(Screen 6)

(2) Uninstallation procedure
   Start uninstallation from the control panel of Windows® .

* If either of the screens in Screen 7 appears, select "Continue" or "YES".
   To reinstall the product after uninstallation, be sure to restart the computer.
   Failure to do so may cause improper operation.
